Lamorinda Weekly food columnist Susie Iventosch, is not only a valuable resource in the kitchen but an interesting read. While most cookbooks have limited usefulness outside of mealtimes, Iventosch's first published recipe collection, entitled *Tax Bites & Tasty Morsels, Who's Been Eating My Pie?*, serves up 151 innovative recipes along with as many intriguing facts-what she terms tax bites-about the U.S. tax system. Cooks and non-cooks alike will find the cookbook filled with an array of delicious, comprehensible recipes with accessible ingredients that Iventosch has culled from a variety of sources and tested and adapted over the years. And conservatives and liberals alike will find the tax bites thought provoking and understandable or incomprehensible depending upon their outlook.

The concept for a cookbook filled with unique tax facts was hatched when Iventosch branched out on her own and started working as an independent contractor. "I was amazed, actually appalled, when I realized the amount of federal, state, and self-employment tax that got first dibs on my paychecks," says Iventosch. "Sometimes, I thought, why work?"

Iventosch, a self-described fiscal conservative, amassed a wide-ranging knowledge of federal and state taxes through her extensive research for the book. The cookbook is organized into chapters by food course with pithy titles and brief essays on tax topics, such as the chapter called *Un-Just Desserts, The Government's Final Helping*, which includes her discourse on the death tax. Every recipe has an accompanying tax bite-fiscal nuggets that are informative, salient, crazy, egregious and everywhere in between.

One of the tax bites that Iventosch finds most amusing is the Illegal Drug Stamp tax. "Twenty states impose this tax, which is so funny, because it is a stamp tax that must be purchased and affixed to illegal contraband. So, if the person is arrested for the contraband, they will not be charged with tax evasion as well," she explains. Iventosch finds some of the tax bites in the chapter of pork recipes, titled *Politicians Love Their Pork, harder to swallow*. "As part of the 2009 Stimulus bill, \$20 million was allocated to design and furnish the Department of Homeland Security headquarters," states Iventosch. She calls that tax bite *Swine Design*.

Cooking has always come naturally to Iventosch, who has no formal training "My love of the kitchen probably started in third grade when I earned the Girl Scout cooking badge. I made chicken tarragon," she says. Food has always been an integral part of her family's dynamic as well. "Meals are a time to catch up on the day as family. Whether we are at the kitchen counter or the table, I try to have us sit together at meals," says Iventosch, who routinely tests new recipes on whoever is home. While the tax codes and tax bites may change with the government administrations, the recipes in this collection will stand the test of time. (This writer, whose daughter loves to bake, has tested the banana bread and coffee cake recipes and gives them two thumbs up.)

*Tax Bites & Tasty Morsels, Who's Been Eating My Pie?* is available locally at Orinda Books and Across the Way in Moraga, at amazon.com, and at Iventosch's website <http://taxbitesandtastymorsels.com>. Iventosch's favorites are available on her website, where visitors can comment on the recipes or the taxes or submit their own tax bite. As she continues to collect new recipes and tax bites, Iventosch may be ready to generate a cookbook sequel-the working title, *Tax Bites Two and All the Trimmings!*
