

The kitchen is the place where her family lives, cooks and entertains. Jasper's kitchen is a mix of functionality and timeless refinement.

The Jaspers built their Orinda home five years ago and Monique, as she worked with architect Doug McQuillan, had precise requirements for the whole house in general, and particularly the kitchen. "I was quite meticulous about how the kitchen had to be laid out," she says, "I cook and I wanted things to be practical when we entertain. I also wanted the space to be a place where my three sons would hang out or do their homework."

Jasper oversaw functional arrangements such as deep drawers directly under the Viking range, and two cutting boards for efficient prep.

Family owned in Moraga since 1987

Your friendly neighborhood arborists Darren and Lew Edwards

ESTIMATING RISK OF TREE FAILURE

A primary goal of tree risk assessment is to provide information about the level of risk posed by a tree over a specific time period. This is accomplished by having a qualified arborist from Advance Tree Service determine the risks of failure. These two factors are determined by:

1. Evaluating the structure conditions that may lead to failure; the potential loads on the tree; and the trees' adaptations to weakness- to determine the likelihood of failure.
2. Assessing the targets' value and potential damage-to estimate the consequences of failure and the likelihood that a tree or branch could strike people or property.

So don't wait until it's too late, call your local Arborist at Advance Tree Service and Landscaping to help you assess your risk today.
