MOFD Station 43 finally germinates

The contractor drilled and poured 36 reinforced concrete piers in May, each pier 20 feet deep and 2 feet wide. In this June photo, workers were placing reinforcing bars - rebar - along the foundation. Next up comes the pouring of the slab.

"Everything is going according to plan and to schedule," Fire Chief Dave Winnacker said. "The team is executing well, and we look to move in by the spring of next year."
